

## 32-17607: Recombinant Human LIGHT Protein, hFc Tag

**Uniprot ID :** O43557

**Alternative Name :** TNFSF14, CD258? HVEM? LIGHT? LTg

### Description

Molecular Characterization: hFc(Glu99-Ala330) LIGHT(Leu83-Val240)

Molecular weight: The protein has a predicted molecular mass of 43.4 kDa after removal of the signal peptide.

Description: Recombinant Human LIGHT protein with N-terminal human Fc

The protein encoded by this gene is a member of the tumor necrosis factor (TNF) ligand family. This protein is a ligand for TNFRSF14, which is a member of the tumor necrosis factor receptor superfamily, and which is also known as a herpesvirus entry mediator (HVEM). This protein may function as a costimulatory factor for the activation of lymphoid cells and as a deterrent to infection by herpesvirus. This protein has been shown to stimulate the proliferation of T cells, and trigger apoptosis of various tumor cells. This protein is also reported to prevent tumor necrosis factor alpha mediated apoptosis in primary hepatocyte. Two alternatively spliced transcript variant encoding distinct isoforms have been reported.

### Product Info

**Amount :** 100 µg / 50 µg

**Content :** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

**Storage condition :** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
