32-17636: Recombinant Human M-CSF Protein, His Tag

Uniprot ID: P09603
Alternative Name: CSF-1, MCSF

Description

Molecular Characterization: M-CSF(Glu33-Arg255) 6×His tag

Molecular weight: The protein has a predicted molecular mass of 26 kDa after removal of the signal peptide. The apparent molecular mass of M-CSF-His is approximately 25-55 kDa due to glycosylation.

Description: Recombinant Human M-CSF with C-terminal 6×His tag

The protein encoded by this gene is a cytokine that controls the production, differentiation, and function of macrophages. The active form of the protein is found extracellularly as a disulfide-linked homodimer, and is thought to be produced by proteolytic cleavage of membrane-bound precursors. The encoded protein may be involved in development of the placenta. Alternate splicing results in multiple transcript variants.

Product Info

Amount : $100 \mu g / 50 \mu g$

Content: Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before

lyophilization.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended

Storage condition: for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.
