

## 32-17813: Recombinant Mouse MFGE8 Protein, His Tag

**Uniprot ID :** P21956  
**Alternative Name :** MFGM; SED1; MP47,MFG-E8

### Description

Molecular Characterization: Mouse MFGE8(Ala23-Cys463) 6 $\times$ His tag  
Molecular weight: The protein has a predicted molecular mass of 49.8 kDa after removal of the signal peptide. The apparent molecular mass of mMFGE8-His is approximately 55-70 kDa due to glycosylation.  
Description: Recombinant mouse MFGE8 protein with C-terminal 6 $\times$ His tag  
Contributes to phagocytic removal of apoptotic cells in many tissues. Specific ligand for the alpha-v/beta-3 and alpha-v/beta-5 receptors. Also binds to phosphatidylserine-enriched cell surfaces in a receptor-independent manner. Zona pellucida-binding protein which may play a role in gamete interaction (By similarity). Plays an important role in the maintenance of intestinal epithelial homeostasis and the promotion of mucosal healing. Promotes VEGF-dependent neovascularization.[UniProtKB/Swiss-Prot Function]

### Product Info

**Amount :** 100  $\mu$ g / 50  $\mu$ g  
**Content :** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.  
**Storage condition :** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
