## 32-17850: Recombinant Mouse STAB1 Protein, His Tag

Uniprot ID: Q8R4Y4

Alternative Name: Stabilin-1, FEEL-1

## **Description**

Molecular Characterization: Mouse STAB1(Leu638-Ala1024) 6×His tag

Molecular weight: The protein has a predicted molecular mass of 41.4 kDa after removal of the signal peptide. The apparent molecular mass of mSTAB1-His is approximately 55-70 kDa due to glycosylation.

Description: Recombinant mouse STAB1 protein with C-terminal 6×His tag

This gene encodes a large, transmembrane receptor protein which may function in angiogenesis, lymphocyte homing, cell adhesion, or receptor scavenging. The protein contains 7 fasciclin, 16 epidermal growth factor (EGF)-like, and 2 laminin-type EGF-like domains as well as a C-type lectin-like hyaluronan-binding Link module. The protein is primarily expressed on sinusoidal endothelial cells of liver, spleen, and lymph node. The receptor has been shown to endocytose ligands such as low density lipoprotein, Gram-positive and Gram-negative bacteria, and advanced glycosylation end products. Supporting its possible role as a scavenger receptor, the protein rapidly cycles between the plasma membrane and early endosomes.

## **Product Info**

**Amount:** 100 μg / 50 μg

Content: Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before

lyophilization.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended

**Storage condition:** for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.
