32-18061: Recombinant Human IL-20RA (C-Fc) Protein

Uniprot ID : Q9UHF4

Alternative Name : Interleukin-20 Receptor Subunit Alpha; IL-20 Receptor Subunit Alpha; IL-20R-Alpha; IL-20RA; Cytokine Receptor Family 2 Member 8; CRF2-8; IL-20R1; ZcytoR7; IL20RA

Description

Molecular weight: 52.4 KDa

Description: Recombinant Human Interleukin-20 Receptor Subunit Alpha is produced by our Mammalian expression system and the target gene encoding Val30-Lys250 is expressed with a Fc tag at the C-terminus.

Interleukin-20 Receptor Subunit a (IL20RA) is a single-pass type I membrane protein that is a member of the type II cytokine receptor family. IL20RA is synthetized a 553 amino acid glycoprotein precursor containing a 29 amino acid signal peptide, a 221 amino acid extracellular domain with two fibronectin type-III domains, a 24 amino acid transmembrane region, and a 279 amino acid intracellular domain. IL20RA is widely expressed with highest levels found in skin and testis and high levels in brain. IL20RA forms a heterodimer with IL20RB, and the complex serves as a receptor for IL19, IL20 and IL24. IL20RA also forms a heterodimer with the unique and specific receptor IL10RB and functions as the receptor for IL26.

Product Info

Amount :	50 µg
Content :	Lyophilized from a 0.2 ?m filtered solution of PBS, pH 7.4.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
