

32-18148: Recombinant Human ANGPT2(275-496) Protein, His Tag

Uniprot ID : O15123
Alternative Name : AGPT2; ANG2; LMPHM10

Description

Molecular Characterization: ANGPT2(Lys275-Phe496) 6Å—His tag

Molecular weight: The protein has a predicted molecular mass of 26.3 kDa after removal of the signal peptide. The apparent molecular mass of ANGPT2(275-496)-His is approximately 25-35 kDa due to glycosylation.

Description: Recombinant Human ANGPT2(275-496) Protein with C-terminal 6Å—His tag

This gene belongs to the angiopoietin family of growth factors. The protein encoded by this gene is an antagonist of angiopoietin 1, and both angiopoietin 1 and angiopoietin 2 are ligands for the endothelial TEK receptor tyrosine kinase. Angiopoietin 2 is upregulated in multiple inflammatory diseases and is implicated in the direct control of inflammation-related signaling pathways. The encoded protein affects angiogenesis during embryogenesis and tumorigenesis, disrupts the vascular remodeling ability of angiopoietin 1, and may induce endothelial cell apoptosis. This gene serves a prognostic biomarker for acute respiratory distress syndrome.

Product Info

Amount : 100 µg / 50 µg

Content : Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

Storage condition : Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
