

## 32-18175: Recombinant Human ACVRL1 Protein, hFc Tag

**Uniprot ID :** P37023

**Alternative Name :** ACVRLK1; ALK-1; ALK1; HHT; HHT2; ORW2; SKR3; TSR-I

### Description

Molecular Characterization: ACVRL1(Asp22-Gln118) hFc(Glu99-Ala330)

Molecular weight: The protein has a predicted molecular mass of 36.8 kDa after removal of the signal peptide. The apparent molecular mass of ACVRL1-hFc is approximately 35-70 kDa due to glycosylation.

Description: Recombinant Human ACVRL1 Protein with C-terminal human Fc tag

This gene encodes a type I cell-surface receptor for the TGF-beta superfamily of ligands. It shares with other type I receptors a high degree of similarity in serine-threonine kinase subdomains, a glycine- and serine-rich region (called the GS domain) preceding the kinase domain, and a short C-terminal tail. The encoded protein, sometimes termed ALK1, shares similar domain structures with other closely related ALK or activin receptor-like kinase proteins that form a subfamily of receptor serine/threonine kinases. Mutations in this gene are associated with hemorrhagic telangiectasia type 2, also known as Rendu-Osler-Weber syndrome 2.

### Product Info

**Amount :** 100 µg / 50 µg

**Content :** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

**Storage condition :** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
