

32-18368: Human CSPG4(1538-2221) Protein, hFc Tag

Uniprot ID : Q6UVK1

Alternative Name : NG2; MCSP; MCSPG; MSK16; CSPG4A; HMW-MAA; MEL-CSPG

Description

Description : Recombinant human CSPG4(1538-2221) Protein with C-terminal human Fc tag

Background : A human melanoma-associated chondroitin sulfate proteoglycan plays a role in stabilizing cell-substratum interactions during early events of melanoma cell spreading on endothelial basement membranes. CSPG4 represents an integral membrane chondroitin sulfate proteoglycan expressed by human malignant melanoma cells.

Molecular Characterization: mass of 98.9 kDa after removal of the signal peptide. The apparent molecular mass of CSPG4(1538-2221)-hFc is approximately 100-250 kDa due to glycosylation.

Tag : C-Human Fc tag

Product Info

Amount : 50 µg / 100 µg

Purification : The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Content : Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

Storage condition : Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
