

## 32-18492: Cynomolgus B7-H4 Protein, His Tag

**Uniprot ID :** A0A2K5U6P5

**Alternative Name :** B7X; B7H4; B7S1; VTCN1; B7h.5; VCTN1; PRO1291

### Description

**Description :** Recombinant Cynomolgus B7-H4 protein with C-terminal 10 $\text{\AA}$ —His tag

**Background :** This gene encodes a protein belonging to the B7 costimulatory protein family. Proteins in this family are present on the surface of antigen-presenting cells and interact with ligand bound to receptors on the surface of T cells. Studies have shown that high levels of the encoded protein has been correlated with tumor progression. A pseudogene of this gene is located on chromosome 20. Multiple transcript variants encoding different isoforms have been found for this gene.

**Molecular Characterization:** mass of 26.5 kDa after removal of the signal peptide.

**Tag :** C-10 $\text{\AA}$ —His tag

### Product Info

**Amount :** 50  $\mu\text{g}$  / 100  $\mu\text{g}$

**Purification :** The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

**Content :** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

**Storage condition :** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
