32-18534: Mouse TSLP Protein, hFc Tag

Uniprot ID: Q9JIE6
Alternative Name: TSLP

Description

Description: Recombinant mouse TSLP protein with C-terminal human Fc tag

Background : Enables cytokine activity. Predicted to be involved in several processes, including defense response to other organism; positive regulation of cytokine production; and positive regulation of signal transduction. Predicted to be located in extracellular region. Is expressed in ductus deferens; epididymis; ileum; and testis. Used to study atopic dermatitis; autoimmune hemolytic anemia; cryoglobulinemia; and membranoproliferative glomerulonephritis. Orthologous to human TSLP (thymic stromal lymphopoietin).

Molecular Characterization: mass of 40.1 kDa after removal of the signal peptide. The apparent molecular mass of mTSLP-hFc is approximately 35-55 kDa due to glycosylation.

Tag: C-Human Fc Tag

Product Info

Amount: 50 μg / 100 μg

Purification: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Content: Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before

lyophilization.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended

Storage condition: for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.
