

32-18548: Mouse TFRC Protein, His Tag

Uniprot ID : Q62351

Alternative Name : TR; TFR; p90; CD71; TFR1; Trfr; Mtvr1

Description

Description : Recombinant mouse TFRC protein with N-terminal 10Å—His tag

Background : This gene encodes a cell surface receptor necessary for cellular iron uptake by the process of receptor-mediated endocytosis. This receptor is required for erythropoiesis and neurologic development. Mice that are deficient in this receptor show impaired erythroid development and abnormal iron homeostasis.

Molecular Characterization: mass of 77.3 kDa after removal of the signal peptide.

Tag : N-10Å—His tag

Product Info

Amount : 50 µg / 100 µg

Purification : The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

Content : Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

Storage condition : Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
