

12-9410: Anti-ROR1 antibody(172B7), IgG1 Chimeric mAb

Clonality :	Monoclonal
Clone Name :	172B7
Application :	FACS
Reactivity :	Human
Uniprot ID :	Q01973
Alternative Name :	ROR1,NTRKR1
Isotype :	Rabbit/Human Fc chimeric IgG1

Description

Description :Anti-ROR1 antibody(172B7), IgG1 Chimeric mAb

This gene encodes a receptor tyrosine kinase-like orphan receptor that modulates neurite growth in the central nervous system. The encoded protein is a glycosylated type I membrane protein that belongs to the ROR subfamily of cell surface receptors. It is a pseudokinase that lacks catalytic activity and may interact with the non-canonical Wnt signalling pathway. This gene is highly expressed during early embryonic development but expressed at very low levels in adult tissues. Increased expression of this gene is associated with B-cell chronic lymphocytic leukaemia. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Jun 2012]

Product Info

Amount :	10 µg / 100 µg
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Application Note

FACS 1/100

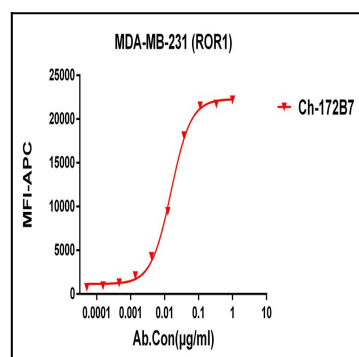

Figure 1. Flow cytometry data of serially titrated Rabbit anti-ROR1 monoclonal antibody (clone: 172B7) on MDA-MB-231 cells. The Y-axis represents the mean fluorescence intensity (MFI) while the X-axis represents the concentration of IgG used.
