

12-9450: Anti-GDF15 antibody(DMC474); IgG1 Chimeric mAb

Clonality :	Monoclonal
Clone Name :	DMC474
Application :	FACS
Reactivity :	Human
Uniprot ID :	Q99988
Alternative Name :	GDF-15; MIC-1; MIC1; NAG-1; PDF; PLAB; PTGFB
Isotype :	Rabbit/Human Fc chimeric IgG1

Description

Description :Anti-GDF15 antibody(DMC474); IgG1 Chimeric mAb

This gene encodes a secreted ligand of the TGF-beta (transforming growth factor-beta) superfamily of proteins. Ligands of this family bind various TGF-beta receptors leading to recruitment and activation of SMAD family transcription factors that regulate gene expression. The encoded preproprotein is proteolytically processed to generate each subunit of the disulfide-linked homodimer. The protein is expressed in a broad range of cell types; acts as a pleiotropic cytokine and is involved in the stress response program of cells after cellular injury. Increased protein levels are associated with disease states such as tissue hypoxia; inflammation; acute injury and oxidative stress. [provided by RefSeq; Aug 2016]

Product Info

Amount :	10 µg / 100 µg
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Application Note

FACS 1:100

Figure 1. Flow cytometry analysis with Anti-GDF15 (DMC474) on Expi293 cells transfected with human GDF15 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).
