

12-9532: Anti-NEFL(89-400) antibody(6C5), Rabbit mAb

Clonality :	Monoclonal
Clone Name :	6C5
Application :	ELISA
Reactivity :	Human
Uniprot ID :	P07196
Alternative Name :	CMT1F; CMT2E; CMTDIG; NF-L; NF68; NFL; PPP1R110
Isotype :	Rabbit IgG

Description

Description :Anti-NEFL(89-400) antibody(6C5), Rabbit mAb

Neurofilaments are type IV intermediate filament heteropolymers composed of light, medium, and heavy chains. Neurofilaments comprise the axoskeleton and they functionally maintain the neuronal caliber. They may also play a role in intracellular transport to axons and dendrites. This gene encodes the light chain neurofilament protein. Mutations in this gene cause Charcot-Marie-Tooth disease types 1F (CMT1F) and 2E (CMT2E), disorders of the peripheral nervous system that are characterized by distinct neuropathies. A pseudogene has been identified on chromosome Y.

Product Info

Amount :	10 µg / 100 µg
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Application Note

ELISA 1:5000-10000

Figure 1. ELISA plate pre-coated by 1 $\hat{1}$ /₄g/ml (100 $\hat{1}$ /₄l/well) Human NEFL(89-400) protein, His tagged protein can bind Rabbit anti-NEFL(89-400) monoclonal antibody(clone: 6C5) in a linear range of 1-100 ng/ml.
