30-1540AF647: Anti-CD160 Monoclonal Antibody (Clone:BY55) Alexa Fluor 647 conjugated

Clonality: Monoclonal

Clone Name: BY55
Application: FACS
Reactivity: Human
Gene: CD160
Gene ID: 11126
Uniprot ID: 095971
Alternative Name: NK1,NK28

Isotype: Mouse IgM kappa

Immunogen Information: Human NK cell line YT2C2

Description

CD160 is a cell surface glycoprotein of immunoglobulin superfamily, which functions as a costimulatory receptor expressed mainly on cytotoxic cell populations and recognizing both classical and non-classical MHC class I molecules. It can form disulfide-linked multimers. Down-modulation of CD160 occurs as a consequence of its proteolytic cleavage and the released soluble form was found to impair the MHC-class I specific cytotoxicity of CD8+ T lymphocytes and NK cells. In contrast to GPI-anchored isoform with broader expression among CD160 positive cells, expression of the transmembrane isoform is restricted to NK cells and is activation-dependent.

Product Info

Amount: 100 tests

Purified antibody is conjugated with Alexa Fluor 647 NHS ester under optimum conditions and

unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

Content: Formulation: Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide

Storage condition: Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.

Application Note

Flow cytometry: The reagent is designed for analysis of human blood cells using 4 μ l reagent / 100 μ l of whole blood or 106 cells in a suspension. The content of a vial (0.4 ml) is sufficient for 100 tests.

Figure 1: Flow cytometry surface staining pattern of human peripheral whole blood stained using anti-human CD160 (BY55) Alexa Fluor 647 antibody (4 μ l reagent / 100 μ l of peripheral whole blood).
