

30-1515PE: PE Conjugated Anti-CD105 Monoclonal Antibody (Clone: MJ7/18)

Clonality :	Monoclonal
Clone Name :	MJ7/18
Application :	FACS
Reactivity :	Mouse
Conjugate :	PE
Gene :	Eng
Gene ID :	13805
Uniprot ID :	Q63961
Format :	Purified
Alternative Name :	Eng,Edg,Endoglin
Isotype :	Rat IgG2a kappa
Immunogen Information :	Inflamed mouse skin

Description

CD105 (endoglin) is a homodimeric transmembrane glycoprotein serving in presence of TGFbetaR-2 as a receptor for TGFbeta-1 and TGFbeta-3. CD105 is highly expressed on endothelial cells and promotes angiogenesis during wound healing, infarcts and in a wide range of tumours and its gene expression is stimulated by hypoxia. CD105 prevents apoptosis in hypoxic endothelial cells and also antagonises the inhibitory effects of TGFbeta-1 on vascular endothelial cell growth and migration. Normal cellular levels of CD105 are required for formation of new blood vessels.

Specificity: The rat monoclonal antibody MJ7/18 reacts with an extracellular epitope of CD105 (Endoglin), a 90 kDa type I homodimerizing membrane glycoprotein expressed on vascular endothelial cells (small and large vessels), activated monocytes and tissue macrophages, stromal cells of certain tissues including bone marrow, pre-B lymphocytes in fetal marrow and erythroid precursors in fetal and adult bone marrow.

Product Info

Amount :	0.1 mg
Purification :	Purified antibody is conjugated with R-phycoerythrin (PE) under optimum conditions. Unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.
Content :	Concentration: 0.5 mg/ml Formulation: Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
Storage condition :	Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.

Figure 1: Flow cytometry analysis (surface staining) of CD105 in murine bone marrow with anti-CD105 (MJ7/18) PE.
