

## 12-9025B: Biotinylated Anti-SARS-CoV-2 RBD antibody(DM35); Rabbit mAb

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	DM35
<b>Application :</b>	ELISA; Flow Cyt
<b>Reactivity :</b>	SARS-CoV-2
<b>Gene :</b>	S protein RBD
<b>Uniprot ID :</b>	P0DTC2
<b>Alternative Name :</b>	SARS-CoV-2 RBD
<b>Isotype :</b>	IgG

### Description

SARS-CoV-2 (Severe Acute Respiratory Syndrome Coronavirus 2) also known as Covid19 (2019 Novel Coronavirus) is a virus that causes illnesses ranging from the common cold to severe diseases. The spike protein is a type I transmembrane protein containing two subunits; S1 and S2. S1 mainly contains a receptor binding domain (RBD); which accounts for recognizing the cell surface receptor; ACE2. S2 contains basic elements needed for the membrane fusion. Recent publications indicate that S1-RBD domain can induce virus neutralizing-antibody and T cell response.

### Product Info

<b>Amount :</b>	10 µg / 100 µg
<b>Purification :</b>	Purified from cell culture supernatant by affinity chromatography
<b>Content :</b>	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
<b>Storage condition :</b>	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

### Application Note

ELISA 1:5000-10000; Flow Cyt 1:100
