12-9622: Anti-ADAM9 antibody(45G10), IgG1 Chimeric mAb

Clonality: Monoclonal
Clone Name: 45G10
Application: IHC
Reactivity: Human
Gene: ADAM9
Uniprot ID: Q13443

Alternative Name : CORD9; MCMP; MDC9; Mltng **Isotype :** Rabbit/Human Fc chimeric IgG1

Description

This gene encodes a member of the ADAM (a disintegrin and metalloprotease domain) family. Members of this family are membrane-anchored proteins structurally related to snake venom disintegrins; and have been implicated in a variety of biological processes involving cell-cell and cell-matrix interactions; including fertilization; muscle development; and neurogenesis. The protein encoded by this gene interacts with SH3 domain-containing proteins; binds mitotic arrest deficient 2 beta protein; and is also involved in TPA-induced ectodomain shedding of membrane-anchored heparin-binding EGF-like growth factor. Several alternatively spliced transcript variants have been identified for this gene.

Product Info

Amount: 10μg / 100 μg

Purification: Purified from cell culture supernatant by affinity chromatography

Content: Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before

lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended

for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

Application Note

Storage condition:

IHC 1:100

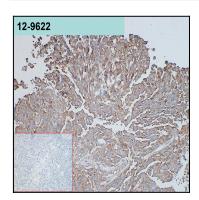

Figure 1. 12-9622 at $10\mu g/ml$ staining ADAM9 in Huh7 xenografts in nude mice by IHC (Cat# 12-9622).
