32-18587: Cynomolgus LIGHT Protein, hFc Tag

Gene :   LIGHT
Uniprot ID :   E9NVF7
Alternative Name : LTg; CD258; HVEML; TNFSF14,Recombinant Cynomolgus LIGHT protein with N-terminal human Fc tag

Description

The protein encoded by this gene is a member of the tumor necrosis factor (TNF) ligand family. This protein is a ligand for TNFRSF14, which is a member of the tumor necrosis factor receptor superfamily, and which is also known as a herpesvirus entry mediator (HVEM). This protein may function as a costimulatory factor for the activation of lymphoid cells and as a deterrent to infection by herpesvirus. This protein has been shown to stimulate the proliferation of T cells, and trigger apoptosis of various tumor cells. This protein is also reported to prevent tumor necrosis factor alpha mediated apoptosis in primary hepatocyte. Two alternatively spliced transcript variant encoding distinct isoforms have been reported. [provided by RefSeq, Jul 2008]

Molecular Weight : The protein has a predicted molecular mass of 44.5 kDa after removal of the signal peptide. The apparent molecular mass of hFc-cLIGHT is approximately 35-55 kDa due to glycosylation.

Tag :N-Human Fc tag

Product Info

|	
Amount :	50µg / 10µg
Purification :	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
