12-8322: Anti-Human Thyroid Stimulating Hormone Beta (Clone 154)-HRP

Clonality: Monoclonal

Clone Name: 154
Reactivity: Human

Alternative Name: HCG, GPH, GPHA1, CGA, Thyrotropin

Isotype: IgG

Immunogen Information: Purified Recombinant Human Thyroid Stimulating Hormone (TSH) Beta (>98%)

Description

Specificity: Mouse Anti-Human Thyroid Stimulating Hormone (TSH) Beta (Clone 154) recognizes Human Thyroid Stimulating Hormone (TSH) Beta. This monoclonal antibody was purified using multi-step affinity chromatography methods such as Protein A or G depending on the species and isotype.

Background: Thyroid-stimulating hormone (TSH), also known as thyrotropin, is a glycoprotein hormone1 that regulates the endocrine function of the thyroid gland.2 The most important controller of TSH secretion is thyroid-releasing hormone. Thyroid-releasing hormone is secreted by hypothalamic neurons into hypothalamic-hypophyseal portal blood, finds its receptors on thyrotrophs in the anterior pituitary and stimulates secretion of TSH.1 Independent of age, thyroid cancer incidence correlates with higher TSH. Higher TSH is associated with extrathyroidal extension of disease.3

Product Info

Amount: 1.0 ml

Concentration: 0.5 mg/ml

Content: Formulation: This horseradish peroxidase conjugate is supplied in a specially formulated

stabilization diluent.

Storage condition : Stable for at least one year when stored at 2°C - 8°C.?Do not freeze.
