

## 32-1097: ProNGF Recombinant Protein

**Alternative Name :** Human Pro-NGF,ProNGF,NGFB.

### Description

Source : Escherichia Coli. Pro NGF is the pro-form of the neurotrophin nerve growth factor. Like the mature protein pro NGF is characterized by the cysteine knot motif consisting of three cysteine bridges. The protein predominantly exists as a non-covalently linked homodimer. Pro-Nerve Growth Factor Human Recombinant produced in E.Coli is a non-glycosylated, polypeptide chain containing 224 amino acids and having a molecular mass of 50KDa. The Pro NGF is purified by proprietary chromatographic techniques.
