

## 32-1100: BNP Protein

**Alternative Name :** NPPB,Natriuretic Peptide Precursor B,BNP,B-type Natriuretic Peptide.

### Description

B-type Natriuretic Peptide Human is a polypeptide chain containing 32 amino acids and having a molecular mass of 3464 Dalton. The molecular formula is:C143H244N50O42S4. Natriuretic Peptide Precursor B acts as a cardiac hormone with a variety of biological actions including natriuresis, diuresis, vasorelaxation, and inhibition of renin and aldosterone secretion. It is thought to play a key role in cardiovascular homeostasis. Helps restore the body's salt and water balance. Improves heart function.

### Product Info

<b>Amount :</b>	25mg
<b>Purification :</b>	Greater than 95.0% as determined by RP-HPLC.
<b>Content :</b>	The protein was lyophilized without additives.
<b>Storage condition :</b>	Lyophilized B-type Natriuretic Peptide although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution B-type Natriuretic Peptide should be stored at 4°C between 2-7 days and for future use below -18°C.For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Please prevent freeze-thaw cycles.
<b>Amino Acid :</b>	SPKMOVQSGGCFGRKMDRISSSSGLGCKVLRHH.

### Application Note

It is recommended to reconstitute the lyophilized B-type Natriuretic Peptide in sterile 18MQ-cm H2O not less than 100µg/ml, which can then be further diluted to other aqueous solutions.
