32-1288: mGM CSF Recombinant Protein

Alternative Name: CSF-2,MGI-1GM,GM-CSF,Pluripoietin-alpha,Molgramostin,Sargramostim.

Description

Source: Escherichia Coli. Granulocyte Macrophage Colony Stimulating Factor Mouse Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 125 amino acids and having a molecular mass of 14285.35 Dalton.GM-CSF Mouse is purified by proprietary chromatographic techniques. GMCSF is a cytokine that controls the production, differentiation, and function of granulocytes and macrophages. The active form of the protein is found extracellularly as a homodimer. This gene has been localized to a cluster of related genes at chromosome region 5q31, which is known to be associated with interstitial deletions in the 5q- syndrome and acute myelogenous leukemia. Other genes in the cluster include those encoding interleukins 4, 5, and 13.GM-CSF stimulates the growth and differentiation of hematopoietic precursor cells from various lineages, including granulocytes, macrophages, eosinophils and erythrocytes.

Product Info

Amount : 20 μg

Purification: Greater than 98.0% as determined by(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.

Content: GM-CSF Mouse was lyophilized with no additives.

Lyophilized Granulocyte Macrophage Colony Stimulating Factor although stable at room

temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution GM-CSF should be stored at 4°C between 2-7 days and for future use below -18°C. For long term storage

Storage condition : should be stored at 4°C between 2-7 days and for future use below -18°C. For long term stored it is recommended to add a carrier protein (0.1% HSA or RSA). Please provent freeze that

it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw

cycles.

Amino Acid: The sequence of the first five N-terminal amino acids was determined and was found to be Met-

Ala-Pro-Thr-Arg.

Application Note

It is recommended to reconstitute the lyophilized Granulocyte Macrophage Colony Stimulating Factor in sterile 20mM AcOH (acetic Acid) not less than $100\tilde{\text{A}}$ $\hat{\text{A}}$ $\hat{\text$
