32-1352: IGFBP6 Recombinant Protein

Alternative Name: IGFBP-6,IBP-6,IGF-binding protein 6.

Description

Source: Escherichia Coli. IGFBP6 Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing amino acids 148-240 and having a molecular mass of 20 kDa including 4kDa His tag. IGFBP6 is purified by proprietary chromatographic techniques. IGFBP6 plays a role in lipoprotein assembly and dietary cholesterol absorption. in addition to its acyltransferase activity, it may act as a ligase. may provide cholesteryl esters for lipoprotein secretion from hepatocytes and intestinal mucosa.

Product Info

Amount: 20 μg

Purification: Greater than 80.0% as determined by:(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.

Content: IBP-6 was lyophilized from a concentrated (1mg/ml) solution containing 1X PBS, 0.1% SDS and

1mM DTT.

Lyophilized IBP6 although stable at room temperature for 3 weeks, should be stored desiccated

Storage condition:

below -18°C. Upon reconstitution IGFBP-6 should be stored at 4°C between 2-7 days and for future use below -18°C. For long term storage it is recommended to add a carrier protein (0.1%).

future use below -18°C.For long term storage it is recommended to add a carrier protein (0.1%

HSA or BSA). Please prevent freeze-thaw cycles.

Application Note

It is recommended to reconstitute the lyophilized Insulin-Like Growth Factor Binding Protein-6 in sterile $18M\tilde{A} \square \hat{A} \odot$ -cm H2O not less than $100\tilde{A} \sqcap \hat{A} \mu g/ml$, which can then be further diluted to other aqueous solutions.
