32-1603: MIA2 Recombinant Protein

Alternative Name : MIA-2, MIA2, Melanoma Inhibitory Activity 2, FLJ22404.

Description

Source : Escherichia Coli. MIA2 Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain consisting of 101 amino having a total molecular mass of 11.5 kDa.The MIA2 is purified by proprietary chromatographic techniques. MIA2 performs as a tumour suppressor in hepatocellular carcinoma. MIA2 is a novel acute phase protein which its expression is found in the liver and reacts to liver damage in chronic liver diseases and is considerably higher in severe fibrosis patients . MIA2 is induced by IL6, TGF-B & and conditioned medium from activated hepatic stellate cells. MIA2 is mainly expressed in hepatocytes.

Product Info

Amount : Purification :	20 μg Greater than 97.0% as determined by(a) Analysis by RP-HPLC.(b) Analysis by SDS-PAGE.
Content :	The MIA2 protein was lyophilized from a concentrated (1mg/ml) solution containing 20mM Phosphate buffer pH=7.4 and 150mM NaCl.
Storage condition :	Lyophilized MIA2 although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution MIA2 should be stored at 4°C between 2-7 days and for future use below -18°C.Please prevent freeze-thaw cycles.
Amino Acid :	MLESTKLLAD LKKCGDLECE ALINRVSAMR DYRGPDCRYL NFTKGEEISV YVKLAGERED LWAGSKGKEF GYFPRDAVQI EEVFISEEIQ MSTKESDFLC L.

Application Note

It is recommended to reconstitute the lyophilized MIA2 in sterile $18M\tilde{A} \equiv \hat{A} \otimes -cm$ H2O not less than $100\tilde{A} \equiv \hat{A} \mu g/ml$, which can then be further diluted to other aqueous solutions.
