

32-1635: NPPC Recombinant Protein

Alternative Name : Natriuretic Peptide Precursor C,C-Type Natriuretic Peptide,CNP2,CNP.

Description

Source : Escherichia Coli. NPPC Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 126 amino acids (24-126) and having a molecular mass of 13.2kDa.NPPC is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. NPPC is proteolytically managed to create a secreted hormone of the natriuretic peptide family. NPPC is vasoactive and natriuretic and controls the evolution and differentiation of cartilaginous growth plate chondrocytes.
