

### 36-3009: Monoclonal Antibody to CD43 (Clone: DF-T1)

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	DF-T1
<b>Application :</b>	FACS, IF, WB, IHC-P
<b>Reactivity :</b>	Human
<b>Gene :</b>	SPN
<b>Gene ID :</b>	105369261
<b>Uniprot ID :</b>	P16150
<b>Format :</b>	Purified
<b>Alternative Name :</b>	SPN,CD43
<b>Isotype :</b>	Mouse IgG1, kappa
<b>Immunogen Information :</b>	Myeloblastic KG1 cells were used as the immunogen for this antibody.

#### Description

This antibody recognizes a 95/115/135kDa (depending upon the extent of glycosylation) surface transmembrane glycoprotein, identified as CD43 (leukosialin, sialophorin, or leukocyte sialoglycoprotein). CD43 is expressed on all thymocytes and T-lymphocytes. Defects in the CD43 molecule are associated with the development of Wiskott-Aldrich syndrome. CD43 is also found in a range of lymphoid and myeloid tumors. Expression of CD43 may be used to identify B-lymphoblastic lymphoma, since the malignant cells in this condition are often CD43 positive. Since CD43 antibody stains granulocytes and their precursors, this antibody may be used as a marker for myeloid tumors. This antibody is also useful in identification and classification of T-cell malignancies.

#### Product Info

<b>Amount :</b>	100 µg
<b>Purification :</b>	Protein G Chromatography
<b>Content :</b>	25 µg in 50 µl/100 µg in 200 µl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium azide is highly toxic.
<b>Storage condition :</b>	Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid repeated freeze and thaw cycles.

#### Application Note

"Flow Cytometry (1-2ug/million cells), Immunofluorescence (1-2ug/ml), Western Blot (1-2ug/ml)

Fig.1: Cell Surface flow analysis of anti-hCD43 antibody (36-3009) in PBMC (Lymphocytes gated) using 0.5 µg/10<sup>6</sup> cells. Green represents isotype control (ABEOMICS); red represents anti-hCD43 antibody. Goat anti-mouse PE conjugated secondary antibody was used (ABEOMICS).
