

10-3012: Monoclonal antibody to MyD88 (Clone: ABM2H20)

Clonality :	Monoclonal
Clone Name :	ABM2H20
Application :	FACS,WB
Reactivity :	Mouse,Human
Gene :	MYD88
Gene ID :	4615
Uniprot ID :	Q99836
Format :	Purified
Alternative Name :	Myeloid differentiation primary response protein MyD88
Isotype :	Mouse IgG1 Kappa
Immunogen Information	A partial length recombinant protein of human MyD88 (amino acids 13-221) was used as an immunogen for this antibody.

Description

MyD88 (Myeloid differentiation factor) is an essential adaptor molecule in all TLR (Toll-like receptor) signaling pathways except TLR3. MyD88 is composed of an N-terminal (Death Domain) and a highly conserved C-terminal TIR (Toll/interleukin-1 Receptor) domain. It is found to stimulate IL-1R/IL18R-mediated signaling. MyD88-dependent signaling is also important in the regulation of innate as well as acquired immunity, in particular, T-cell responses, to various microbial pathogens. After activation of TLRs, MyD88 is phosphorylated and subsequently recruits IRAKs (IL-1R Associated Kinases) and other downstream proteins such as TRAF6, finally resulting in activation of the NF-kappaB (nuclear factor kappa B) pathway.

Product Info

Amount : Purification :	25 μg / 100 μg Protein G Chromatography
Content :	25 μg in 50 $\mu l/100~\mu g$ in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium azide is highly toxic.
Storage condition :	Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid repeated freeze and thaw cycles.

Application Note

Western blot analysis: 0.1-2 μ g/ml; FACS Analysis: 0.5-1 μ g/ml
