

10-7569: Monoclonal Antibody to PAPP-A (Clone: ABM4C62)

Clonality :	Monoclonal
Clone Name :	ABM4C62
Application :	IHC
Reactivity :	Human
Gene :	PAPPA
Gene ID :	5069
Uniprot ID :	Q13219
Format :	Purified
Alternative Name :	Insulin-like growth factor-dependent IGF-binding protein 4 protease, IGF-dependent IGFBP-4 protease, Pregnancy-associated plasma protein A
Isotype :	Mouse IgG2b Kappa
Immunogen Information :	A partial length recombinant PAPP-A protein (amino acids 332-561) was used as the immunogen for this antibody.

Description

PAPP-A (pregnancy-associated plasma protein A) is a zinc metalloproteinase in the insulin-like growth factor system that is expressed by tissues outside of pregnancy and involved in normal and dysregulated growth. It has prognostic impact in pregnancy and acute coronary syndrome. PAPP-A regulate the activity of insulin-like growth factor (IGF) signal pathway through proteolytic degradation of IGF binding proteins (IGFBPs) thereby increasing the local concentration of free IGFs available to receptors. PAPP-A levels is associated with abnormal glucose metabolism and increased risk of atherosclerosis in AGHD (Adult Growth Hormone Deficiency) patients.

Product Info

Amount :	25 µg / 100 µg
Purification :	Protein G Chromatography
Content :	25 µg in 50 µl/100 µg in 200 µl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium azide is highly toxic.
Storage condition :	Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid repeated freeze and thaw cycles.

Application Note

Immunohistochemical analysis: 5-10 µg/ml

Fig-1: Immunohistochemical analysis of PAPP-A in human Placenta tissue using PAPP-A antibody (Clone: ABM4C62) at 5 μ g/ml.
